

COMPANY **PROFILE**

COMPANY INTRODUCTION

Company Overview

L AND N Group (Pty) Ltd is a South African-based multi-disciplinary company providing specialised services in electrical engineering, mechanical mining support, industrial supply, and civil construction. We support the mining, power generation, petrochemical, and industrial sectors through reliable delivery of technical solutions, compliant workmanship, and efficient sourcing of engineering equipment. Our company is built on a foundation of professionalism, technical competence, and strong client relationships. We understand the operational demands of mining houses such as Exxaro, where safety, uptime, and quality service are essential. L AND N Group delivers both project-based execution and ongoing maintenance support, ensuring that client operations remain productive, safe, and compliant.

Vision

To become a trusted and preferred engineering and construction service provider within the South African mining and industrial sector through innovation, service excellence, and long-term partnerships.

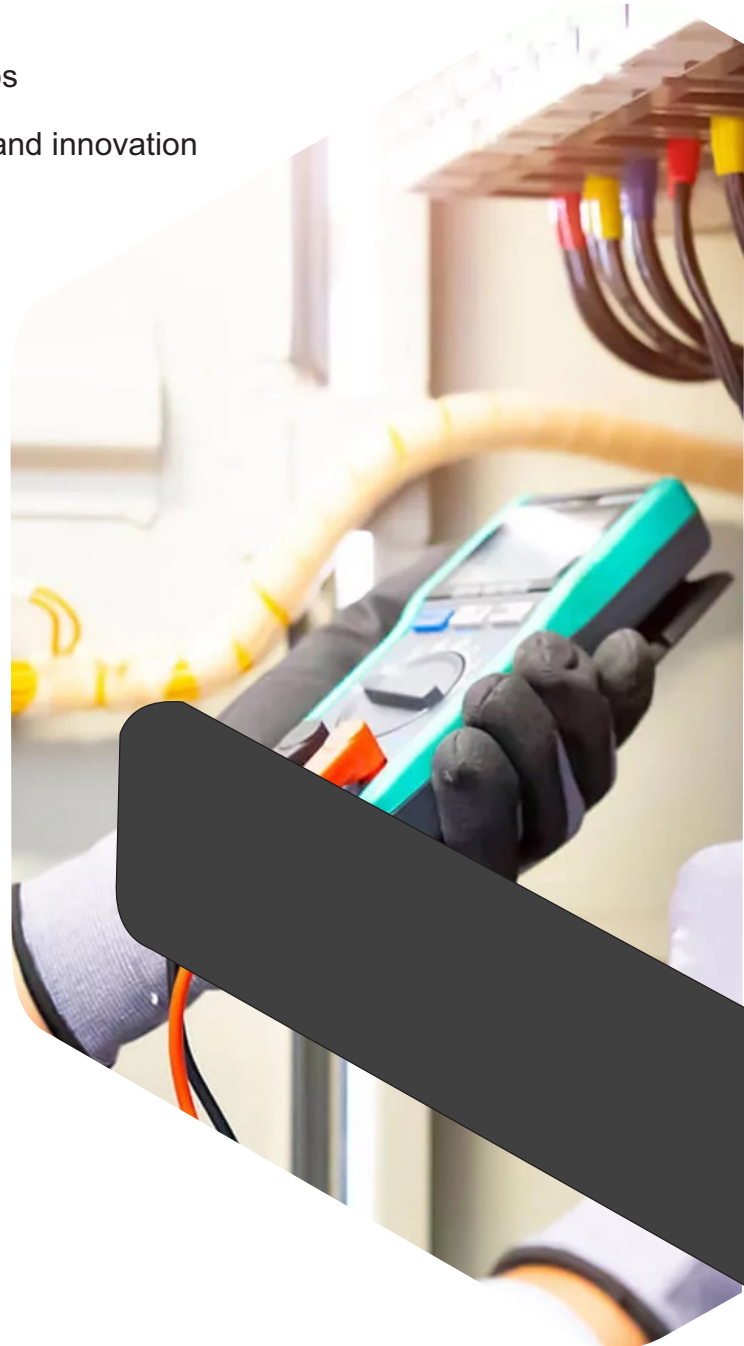

Mission

Our mission is to provide high-quality engineering supply and technical services that meet client specifications, exceed expectations, and contribute to sustainable industrial operations.

Core Values

- Safety First – Zero harm approach
- Integrity – Transparent and ethical business conduct
- Quality Delivery – Fit-for-purpose solutions
- Client Commitment – Strong service partnerships
- Continuous Improvement – Skills development and innovation

ELECTRICAL ENGINEERING SERVICES

Electrical Contracting & Engineering Capability

L AND N Group (Pty) Ltd offers complete electrical engineering services for industrial and mining applications. Our technical team has experience working with complex electrical systems requiring strict compliance with South African regulations and mining safety standards.

Our electrical services include:

Low Voltage Installations

- Industrial power distribution systems
- Plant electrical reticulation
- Lighting, small power and infrastructure wiring
- Cable management and containment systems

ELECTRICAL ENGINEERING SERVICES

Motor Control & Pumping Solutions We specialise in electrical systems supporting pump and motor-driven operations:

- Borehole pump control panels (DOL, Star-Delta, VSD)
- Motor protection systems (under-current, overload, phase failure)
- Pump station installations and control upgrades
- MCC and feeder panel construction Maintenance & Fault Finding
- Preventative and breakdown maintenance
- Electrical diagnostics and troubleshooting
- Termination, testing, and commissioning
- Equipment replacement and retrofit support.

Industrial Panel & Switchboard Solutions We supply and support:

- Distribution boards (DBs)
- Motor control centres (MCCs)
- PLC and automation panels
- Outdoor IP-rated electrical enclosures
- Custom-built control cabinets All panels are designed and assembled with consideration for:
 - IEC/SANS compliance
 - Mining operational conditions
 - Safe isolation and protection requirements

MECHANICAL SERVICES & MINING SUPPORT

Specialised Mechanical Support for Mining Operations

L AND N Group (Pty) Ltd provides comprehensive mechanical engineering and refurbishment services to support mining production, plant reliability, and fleet uptime. Our mechanical division is structured to deliver high-quality repair, rebuild, and maintenance solutions for heavy-duty mining equipment and associated components.

We understand the critical operational requirements within the Exxaro environment, where equipment availability, safety compliance, and turnaround time are essential.

Trackless Mobile Machinery (TMM) Services

L AND N Group offers specialised services for Trackless Mobile Machinery, supporting underground and surface mining fleets through preventative maintenance, breakdown response, and component repair.

Our TMM scope includes:

- General TMM maintenance and mechanical repairs
- Wheel motor supply, replacement, and repair solutions
- Gearbox repairs, rebuilds, and overhaul services
- Hydraulic system fault finding and diagnostics
- Component rebuilding to extend equipment life and reduce replacement costs

These services contribute directly to improved machine uptime and reduced operational disruption.

Line Boring Services

We provide precision on-site line boring services for the restoration of worn or damaged mechanical assemblies. This capability is essential for large mining equipment where removal and off-site machining may cause extended downtime.

Our line boring services include:

- On-site line boring and machining
- Bucket, boom, and frame restoration
- Bearing housing refurbishment and alignment correction
- Repair of pivot points and structural wear areas

This service supports efficient refurbishment and prolongs equipment service life.

Equipment Rebuilding & Refurbishment

L AND N Group delivers equipment rebuilding and mechanical refurbishment solutions for mining and industrial operations, ensuring assets are restored to safe and functional operating condition.

Our refurbishment scope includes:

- Structural mechanical repairs
- Full mechanical reconditioning
- Component overhaul and replacement
- Industrial WAP equipment support
- Restoration of worn components to OEM tolerance where applicable.

Truck Painting & Protective Coating Services

We provide professional industrial painting and coating solutions for mining fleets, structural steelwork, and equipment exposed to harsh operational environments.

Our coating services include:

- Surface preparation and blasting where required
- Application of industrial coating systems
- Corrosion protection for high-wear mining environments
- Fleet refurbishment and aesthetic restoration

These protective solutions improve asset longevity, reduce corrosion-related failures, and maintain professional fleet standards

ENGINEERING SUPPLY & PROCUREMENT SUPPORT

Industrial Supply and Procurement Services

L AND N Group provides reliable sourcing and supply of electrical, mechanical, and instrumentation components to support mining and industrial operations.

We understand the importance of lead times, OEM compliance, and cost-effective alternatives.

Our supply categories include:

Electrical Equipment

- Circuit breakers, isolators, contactors
- Protection relays, timers, control devices
- Cable, glands, lugs, and accessories
- Industrial lighting and power components

Switchgear and Enclosures

- Wall-mounted and floor-standing enclosures
- Stainless steel and mild steel cabinets
- Junction boxes and hazardous-area housings
- IP65/IP66 solutions for harsh environments

Mechanical & Rotating Equipment

- Industrial pumps (KSB, Grundfos, Franklin, etc.)
- Electric motors (WEG, Siemens, ABB)
- Couplings, guards, baseplates
- Bearings, seals, and spares

Valves, Pipes & General Engineering Spares

- Butterfly, gate, and control valves
- Flanges, fittings, industrial fasteners
- OEM replacement parts for mining plants

Value-Added Procurement Advantage

Our procurement approach provides Exxaro with:

- Fast turnaround on urgent spares
- Strong supplier network and OEM sourcing
- Cost-effective equivalent alternatives
- Technical verification of part numbers
- Documentation support for RFQs and tenders

CIVIL, CONSTRUCTION, SAFETY & CLIENT COMMITMENT

Construction and Infrastructure

Support L AND N Group (Pty) Ltd provides civil and construction services supporting mining facilities, offices, accommodation units, and industrial infrastructure.

Our construction scope includes:

- Building renovations and maintenance works
- Concrete works, brickwork, plastering, and painting
- Structural repairs and minor steelwork
- Industrial site construction support

Safety, Quality and Regulatory Compliance

L AND N Group (Pty) Ltd operates with full awareness of mining and industrial safety requirements. We support client safety systems and ensure work is conducted according to:

- Occupational Health and Safety Act
- Mine Health and Safety standards
- Client-specific site rules and permit systems
- Quality-controlled installation and supply procedures

Why L AND N Group (Pty) Ltd for Exxaro

We bring value through:

- Reliable engineering supply support
- Skilled electrical, mechanical, and construction capability
- Fast response to operational needs
- Mining-focused service delivery
- Commitment to safety, quality, and long-term partnership

Company Information

Company Name: L AND N GROUP (PTY) LTD

Business Type: Electrical Engineering • Mechanical

Support • Industrial Supply • Construction Services

Industry Focus: Mining | Power | Industrial Infrastructure

Operating Region: South Africa

CK: 2022/393900/07

VAT: 4110322130,

CSD: MAAA1205159

PROJECT EXECUTION & OPERATIONAL CAPABILITY

Project Delivery Approach

L AND N Group (Pty) Ltd applies a structured delivery methodology to ensure projects are executed safely, efficiently, and in accordance with client specifications. Our operational model supports both short-duration maintenance tasks and longer-term engineering projects.

Key delivery principles include:

- Clear scope definition and technical clarification
- Planned procurement and controlled material sourcing
- Competent supervision and quality workmanship
- Safety compliance aligned with mining standards
- Timely reporting and client communication.

Maintenance Support & Shutdown Services

We provide flexible support for planned shutdowns, breakdown response, and preventative maintenance programmes.

Typical services include:

- Emergency electrical and mechanical repairs
- Planned equipment refurbishment
- Site support teams for shutdown periods
- Replacement of worn components and spares management

CLIENT SECTORS & SERVICE APPLICATIONS

Sectors We Serve

LAND N Group (Pty) Ltd delivers services and supply solutions across multiple sectors, including:

- Mining operations and processing plants
- Power generation and utilities
- Water and pumping infrastructure
- Industrial manufacturing facilities
- Commercial building services

Typical Applications in Mining Environments

Our capabilities are aligned with the operational requirements of mining houses such as Exxaro, including:

- Pump station electrical control and protection
- TMM component rebuild and refurbishment
- Structural repairs and corrosion protection
- Industrial panel building and distribution
- Supply of critical spares and OEM-equivalent parts

QUALITY ASSURANCE & CLIENT COMMITMENT

Quality Management Commitment

L AND N Group is committed to delivering quality-controlled services and fit-for-purpose equipment.

Our internal quality approach ensures:

- Verification of client specifications
- Inspection of supplied components
- Workmanship aligned to industry best practice
- Documented handover and close-out

Client Partnership Focus

We aim to build long-term partnerships with clients through:

- Consistent service delivery
- Reliable sourcing and supply
- Fast response times
- Professional technical support
- Continuous improvement and skills development.
